

DEPARTMENT OF GEOLOGY
UNIVERSITY OF CALICUT

SEMINAR ON “GEOLOGY FOR SUSTAINABLE DEVELOPMENT”

on
20th December 2016

Department of Geology have been organized a one-day seminar on “Geology for Sustainable Development” with an objective of creating knowledge for students that the Geology has vital role to play the sustainable development of the nation through economic mineral resources of the country. And as long as civilization exists with higher prosperity and larger inclusivity, huge volumes of natural resources, in all three states of matter (i.e., solid, liquid and gas) need to be consumed. In the academia it is a known fact that the inadequacy of mineral and fuel resources does reflect in the GDP of the nations. For example, nearly 5% of the Indian GDP is contributed by their natural resources and the ores and minerals. And also, the fact that this kind of seminar will help the students to enhance and enrich the knowledge in geological prospecting.

The program was inaugurated by the Hon.Pro-Vice-Chancellor Dr.P.Mohan and who emphasized the importance of geology for the sustainable development of the nation. Dr.C.C.Harilal was felicitated in this seminar. Dr.P.Manjula (Technical Officer, IHD, CWRDM) was the chief guest of this seminar and she had delivered a lecture on “Management of Water Resources using Isotope Hydrology”. The second lecture was given by Dr.Adarsh.P, Coordinator of the Department on “Liquid Gold: A Message for water protection and followed by Mr.Rajeesh.U, Technical Officer, Dept. of Geology, University of Calicut was delivered a lecture on “Remote Sensing & GIS – Applications”
